Deco Wall Aluminium cladding

The Deco Wall aluminum cladding perfectly matches contemporary architecture. The facade cladding consists of a simple click system with vertical or horizontal profiles in different designs. The invisible fixation and straight lines give the house a sleek look.

CHARACTERISTICS

THE ULTIMATE FREEDOM OF CHOICE

With 4 vertical profiles: narrow, wide, deep or open and 1 horizontal profile, you determine the lines of your home yourself.

The choice is also endless in color. You can choose from the complete Aliplast color range where many colors have a 25 year Seaside color guarantee. An extra special play of colors can be obtained by taking the background profile in a different color as the finishing profile.

Give your home a unique look by also covering doors and gates. You can also run the Deco Wall over your window. In this way you bring the light inside, but there is no full view into your home.

THE ULTIMATE SIMPLE INSTALLATION

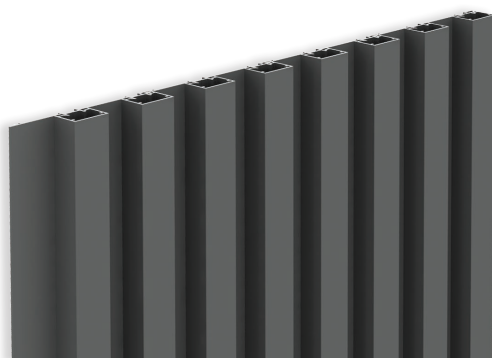

The facade cladding system consists of several base profiles, including start, transition, corner and an end profile. The finishing profiles are mounted as a click system. In this way you get invisible fixations.

It is obvious that the Deco Wall is so much more than just a facade cladding.

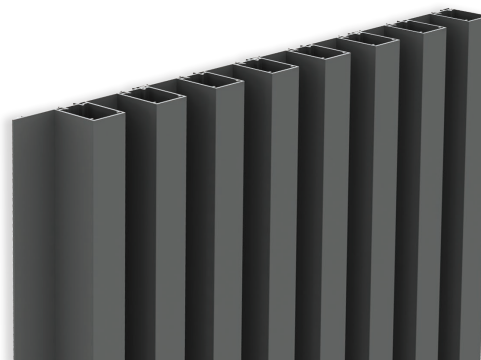

DURABLE AND MAINTENANCE FRIENDLY

The aluminum is characterized by its durability and easy maintenance of the material. The aluminum cladding is resistant to all weather conditions. It is a strong material that is also 100% recyclable. This facade cladding is easy to clean in terms of maintenance. The powder coating provides a good protective layer and retains the color.

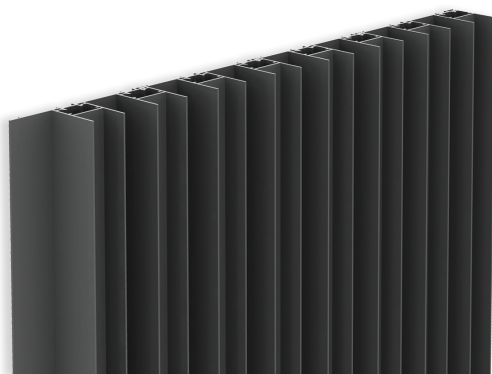

CHOICE OF 4 DIFFERENT FINISHING PROFILES FOR A VERTICAL INSTALLATION
AND 1 FOR A HORIZONTAL.

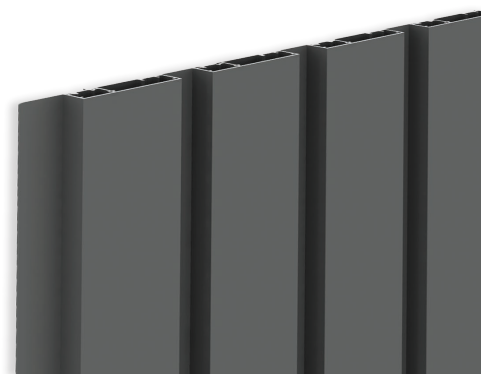

The DW230 is the low vertical profile. The finishing profiles have a width of 30mm and a depth of 20mm.

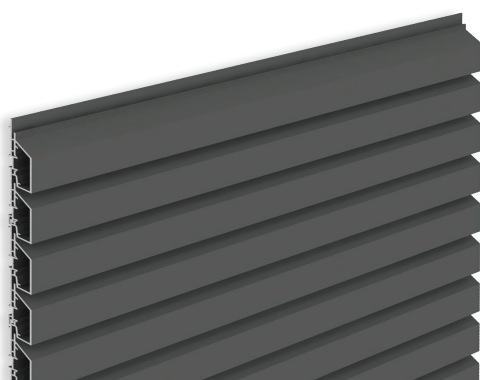

With the DW231, the vertical profiles are 40mm deep. The dark shadows between the profiles emphasize the straight lines of the facade cladding.

The DW232 is a U-profile. The vertical profiles have a slender open side, which can be filled in with colors or lighting as desired.

The vertical profiles of the DW240 are 80mm wide. This makes the lines play more subtle. Ideal for larger areas.

The DW233 is a horizontal profile. The sloping top ensures that no water remains on the profiles.

DECO WALL

for your
contemporary
home

Deco Wall

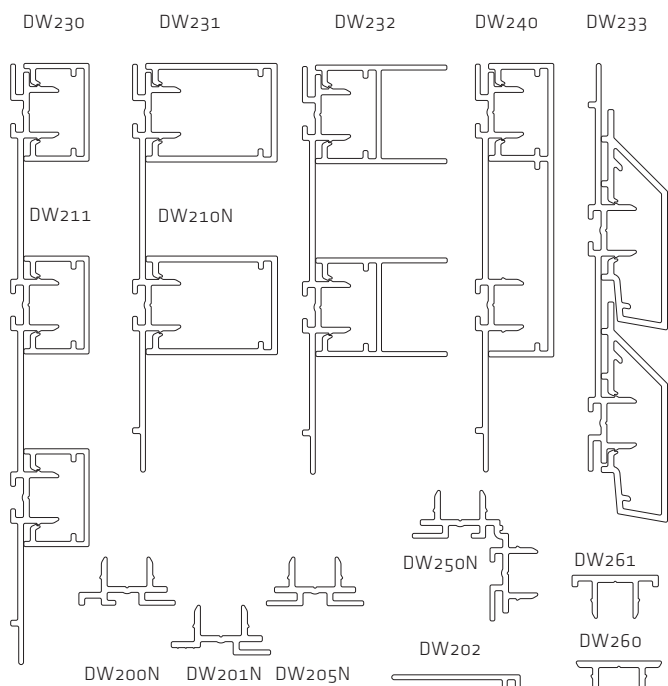

FEATURES

- Vertical or horizontal profiles
- Contemporary architecture
- Windows, doors and gates can be clad
- Choice from the complete Aliplast colour range

100% MADE IN BELGIUM

Aliplast develops aluminium profiles tailored to current housing needs. Everything happens under one roof: from drawing to extrusion, powder coating, insulation and transport to the Aliplast distributors. The distributors produce and install the finished windows in your building project.

25-YEAR COLOUR GUARANTEE

Aliplast gives a 25-year guarantee on 50 current colours. The Qualicoat Seaside quality label ensures that your paint colour is extra protected against aggressive environments (exhaust fumes, salty sea air, etc.). You enjoy a 15-year guarantee on all other colours. Peace of mind for the future.

DURABLE PRODUCT

Aluminium is a durable product because it has a long lifespan. Moreover, the material is fully recyclable and can therefore be completely reused without compromising on quality. Aliplast was awarded the Cradle to Cradle certificate on this system: it is suitable for circular construction, it has a positive impact on people and the environment, it contains no harmful substances and is manufactured using green energy.
