ALUMINIUM SYSTEMS

# Miniline

Minimalist sliding windows

The **MINILINE** is a minimalist sliding glass wall. All aluminium profiles are built into the ground, ceiling and wall. Remains: **only the vertical aluminium profile only 20 mm wide.** Thermally insulated.

Thanks to the fully integrated ultra-slim profiles, transparency is maximised. This system is **completely barrier-free** and regulates drainage with a sloping pedestal profile connected to a drainage channel on the outside of the sliding window.

Very large sliding glass sashes are possible with a maximum weight of up to 500kg. The miniline is available in galandage, mono, duo or tri-rail versions.

The **open corner solution** provides a spatial connection between inside and outside. An uninterrupted view to enjoy.

# Miniline

## PERFORMANCE LEVEL

UW-VALUE		1.5 W/m <sup>2</sup> K*
AIR TRANSMISSION	NBN EN 12207	Class 4
WATERTIGHTNESS	NBN EN 12208	Class 8A
RESISTANCE TO WIND	NBN EN 12210	Class A4
ACOUSTICAL INSULATION		up to 35dB (-1; -5)

\* 5000mm x 2800mm / UG 0.8 W/m<sup>2</sup>K & PSI 0.036W/MK / profile combination: MIN010 - MIN020

## TECHNICAL FEATURES

- Galandage, mono-rail, duo-rail or tri-rail
- Vertical centre post of 20 mm
- Open angle of 90°
- Completely barrier-free
- Maximum vent weight : 500kg
- Maximum dimensions : 4000 mm high - 12 m2 surface area - glass thickness 36 mm

## 100% MADE IN BELGIUM

100%  
MADE IN  
BELGIUM

Aliplast develops aluminium profiles tailored to current housing needs. Everything happens under one roof: from drawing to extrusion, powder coating, insulation and transport to the Aliplast distributors. The distributors produce and install the finished windows in your building project.

## 25-YEAR COLOUR GUARANTEE

25  
YEARS  
COLOR  
LOCKED

Aliplast gives a 25-year guarantee on 50 current colours. The Qualicoat Seaside quality label ensures that your paint colour is extra protected against aggressive environments (exhaust fumes, salty sea air, etc.). You enjoy a 15-year guarantee on all other colours. Peace of mind for the future.

## DURABLE PRODUCT

Aluminium is a sustainable product because, in addition to its long lifespan, it is infinitely recyclable without compromising quality. We use a mix of primary billets with the lowest possible carbon footprint and recycled aluminium billets for our systems. The energy required to recycle profiles (melting process) is only 5% of the initial energy needed to produce primary billets.
